Holiday, Florida, March 29, 2024

### ***Water, water not everywhere***

**Infinite Complex** monitors all events related to water. Water health, water security, water drought, water technology, water stress, water conflicts, water tensions, water temperature, water evaporation, water use, water waste, water recycling, water footprint, water consumption, water pollution, water scarcity, water resources, water infrastructure, water efficiency, water companies, water currency, water filtration, water everything.

Why do the companies of **Infinite Complex** invest time and money to monitor water? Easy answer is that WATER IS LIFE. Sometimes it's easy to forget that we also use water in ways we don't see every day. Besides providing life, along with the sun and air, water is used to grow our food, manufacture our favorite goods, and keep our businesses running smoothly. We also use a significant amount of water to meet the world's energy needs.

**Infinite Complex** sums it up this way: Water is vital to the survival of everything on the planet. The Earth might seem like it has abundant water, but in fact less than 1 percent is available for human use. The rest is either salt water found in oceans, fresh water frozen in the polar ice caps, or too inaccessible for practical usage. Altering these aspects of our planet can have lasting negative effects. While population and demand on freshwater resources are increasing, supply will always remain constant. And although it's true that the water cycle continuously returns water to Earth, it is not always returned to the same place, or in the same quantity and quality.

**Infinite Complex** is focused on water today and water for our future. **Infinite Complex** is astutely aware of strains on our water supplies and our aging water treatment systems. Especially in large areas of the world where it is difficult to acquire or water doesn't exist at all. **Infinite Water Inc** is the leader in creating moisture from the air into pure water without any effect on the air or environment, **Teraview Inc.** uses the most advanced IP to determine and measure water content anywhere on the Earth. As **Infinite Complex** acquires or finances other business involved in water sustainability, they are fulfilling their mission statement to improve and sustain the quality of life for all.
