The cost of living

Infinite Complex creates wealth by investment into IP and sectors which have a clear focus on actual needs for a healthy and better existence. **Infinite Complex** continuously gathers information that provides a basis of the type of ROI needed for individuals and families to have what is commonly referred to as “**The American Dream**”.

Infinite Complex believes that adding the most common criteria to fulfill “**The American Dream**”, currently totals out to **\$4.4 Million**. Consider the lifetime costs of raising 2 children to age 18, add college and we are over \$800,000. Between ages 29-84 and own a car you are looking at another \$800,000. Even a modest home with a 30-year mortgage is a **Million**. Compile pets, getting married, vacations and even dying and you can see life does not come cheap. Last thing, how much will it cost to retire for 20 years? **Infinite Complex** suggests you have at least **\$1.6 Million**.

Infinite Complex is providing this as a simple math problem. The cost of the “**American Dream**” exceeds the life time salaries of both men (**\$3.3 million**) and women (**\$2.4 million**)

The fact that a vast majority of families cannot afford to invest in ‘Blue Chips’ let alone buy one share of **Berkshire Hathaway** or even one **Bitcoin** leaves many alternatives most people are not aware of. **Infinite Complex** suggest that their investors place funds into **Infinite Water Inc.** and its subsidiaries.

Infinite Water Inc. with its **AWG** patents is able to make pure **water**. Consider the need for **water** for everything on our planet. Consider the growing population. Consider the pollution of all water sources. Consider what we are not able to do without it. Consider a smart investment in **water**.
