Unicorns

Infinite Water Inc. and Infinite Complex are further positioning their future investments towards operations in India. **Infinite Water Inc. and Infinite Complex** realizes that India's unicorn ecosystem has experienced significant growth since its first unicorn InMobil emerged in 2011. The ecosystem has seen 2024 as a stellar year with new unicorns of note.

Infinite Water Inc. and Infinite Complex has ties to India with financial partnerships, plus waste water and recycling projects, generative AI with critical data for agriculture and energy. **Infinite Water Inc. and Infinite Complex** takes note that these are exactly the innovations that are emerging and quickly succeeding in making India rank third globally, following the United States and China. This growth is further bolstered by the Indian government's initiatives, such as "Startup India" which is playing a pivotal role in fostering this growth by offering favorable policies, funding programs and tax incentives.

Infinite Water Inc. and Infinite Complex has several Pvt Ltd entities registered throughout India in diverse sectors including water recycling and distribution, Atmospheric Water Generation, AI solutions and platforms which provide deep market intelligence.

Infinite Water Inc. and Infinite Complex are firmly imbedded in the water resources sector of India, as well as North America. In India, **Infinite Water Inc. and Infinite Complex** work with Government-led initiatives like the Jal Jeevan Mission. Their investment of approximately \$ 250 billion across the country's water sector for irrigation, river purification, drinking water, and groundwater recharge allows **Infinite Water Inc. and Infinite Complex** a unique position to create many more unicorns in the near future.
