Why is money referred to as water?

Infinite Water Inc. and Infinite Complex wonder if people ever notice how we talk about money as if it's a moving, living thing? That's because, much like water, money is meant to move. It's not meant to stagnate, hoard, or flood. It should circulate, support life, and keep flowing. If you see money as water, our monetary system is the irrigation system that waters the economy.

Infinite Water Inc. and Infinite Complex view "money-water" as being referred to as a metaphor for financial concepts like cash flow and debt, or to literal products like spiritual waters for attracting wealth or even to artistic and poetic themes. The term uses the flow of water to explain how money should move through a financial system to be effective, much like currency meaning "to flow" in Latin.

Flow and circulation: Money is often compared to water because it is meant to be a flowing resource, not a stagnant one. Phrases like "income streams," "cash flow," "liquid assets," and "drowning in debt" highlight this metaphor.

Debt: High-interest debt, like credit card debt, is described as a leak in a boat, hindering financial progress.

Economic systems: The "waterworks" of money describe how a society's economic system functions, with a well-functioning system leading to prosperity.

Spiritual/mystical waters: There are various products sold as "spiritual money water" intended to help attract wealth, often made with herbs, oils, and other ingredients.

Infinite Water Inc. and Infinite Complex believe that the better the flow, the more prosperous society will be. Just as water makes crops thrive, so money sets the economy in motion. Or at least that's the idea. That is why **Infinite Water Inc. and Infinite Complex** place their money in water for win-win results- do you get the idea?
