Hudson, Florida, May 29, 2026

Who are we?

Infinite Water Incorporated is a strategic facilitator that operationalizes high-impact innovations from inception through to monetization. As industry disruptors, we leverage an asset-light model and last-mile ownership to capture global opportunities across two primary, high-growth verticals:

1. Water Infrastructure & Technology

We deploy world-class, proprietary Air-to-Water Generation (AWG) technologies—backed by a comprehensive portfolio of current and pending U.S. patents.

- **Global Strategy:** We partner with leading international manufacturers and engineering firms to scale internally developed products.
- **Indian Operations:** Through **Infinite Water (India) Private Limited**, we fuse cutting-edge technology with Public-Private Partnership financing. Operating as integrators and project managers, we deliver high-ROI infrastructure projects partially guaranteed by the State.
- **Local Delivery:** Our partnership with KF administers local manufacturing, sales, marketing, and after-sales service of AWG products specifically for the Indian market.

2. Artificial Intelligence & Grid Optimization

Our second vertical operates through **TeraView, Inc.** and **TeraView (India) Private Limited**, both established entities positioned for upcoming financing rounds. Through these vehicles, we maintain proprietary access to two distinct Intellectual Property assets and their derivatives.

- **Strategic Partnership:** In collaboration with **QueNext Decision Sciences Pvt. Ltd.** and its founding technology experts, we leverage proprietary, U.S.-patented technology.
- **Application:** This AI-driven technology is engineered to monitor and optimize electricity usage, offering critical efficiency solutions for power generators and distribution networks.

Valuation and Outlook

By bridging the gap between groundbreaking technology and strategic market execution, **Infinite Water Inc.** is uniquely positioned to unlock massive enterprise value. Based on conservative projections and the disruptive nature of our dual-vertical portfolio, these combined technologies are projected to add millions to the baseline value of the company, offering exponential growth potential.
